SPACELINE II
The best gets better again!
SPACELINE II

The best gets better again

With a market share of more than 65 %, SINGULUS TECHNOLOGIES is offering its latest version of the replication line SPACELINE II: this system is capable of producing all Single and Dual Layer DVD (9, 5, 10) formats.

Based on the experience of 1,100 systems in the market, the SPACELINE II offers a process cycle time faster than 2.3 sec.

The SPACELINE II achieves the most cost-efficient disc production and highest product quality and yield available in the market, making it the new industry benchmark for DVD.

The SPACELINE II is available with EMOULD or MoldPro molding machines.

With the new MoldPro all-electric molding machine from SINGULUS MOLDING, the SPACELINE II provides the smallest footprint worldwide. Other qualified molding machines may be integrated on request.

The SPACELINE II, with many patented original parts (SMART CATHODE®, TMD, Spin Cooler, etc.), ensures a high daily production rate for DVD.

With its worldwide sales and service network, SINGULUS TECHNOLOGIES is able to provide exceptional support together with technological synergies to benefit our customers.
Concept

- Dedicated to produce DVD 5, DVD 9 and DVD 10
- Production cycle times
  - 2.30 seconds for DVD 5 and DVD 9
  - 2.50 seconds for DVD 10
- Confirms to either CE or UL industrial standards
- Modular, highly integrated design incl. all production steps from molding, spin-cooling, metallizing, bonding, UV curing to quality inspection, minimum space required
- Transmission Measurement Device (TMD) for closed loop control of both metallized disc halves
- High productivity and high uptime
- Clear structured disc flow, avoiding mismatch between discs halves
- Automated handling of DVD through all production steps
- Excellent maintenance and service accessibility
- Highly reliable
- DVD handling by mechanical 3-finger grippers via center hole of disc
- Transportable to the production site with fork lift truck
**Main Components**

1. **Injection Molding**
   Simultaneous molding of both halves of a DVD disc is essential for its quality and its synchronized presentation to the downstream. SINGULUS TECHNOLOGIES recommends using the following molding machine suppliers and models:
   - SINGULUS MoldPro
   - SINGULUS EMOULD

   Other qualified DVD molding machines can also be integrated upon request.

2. **Spin Cooler Unit**
   Provides fast and homogenous temperature reduction on the discs. Allows handling and managing of the disc halves without deviation and birefringence impact.

3. **Input Conveyor**
   An adjustable clean airflow device results in best pre-process conditions for every single substrate.

4. **SINGULUS V Metallizer with TMD Sputter Layer Measurement**
   With more than 5000 units in operation during five years of daily production, the latest Singulus metallizer has proven its reliability and efficiency with our major customers. Both metallizers in the SPACELINE II are equipped with SMART CATHODES®, allowing the use of a large range of sputter materials. By implementing a closed-loop system between the metallizer and the Thickness Measurement Device (TMD), SINGULUS has exceeded requirements for layer uniformity while also extending target lifetime as compared to other systems on the market.

5. **Bonding Resin Dosing Unit**
   Separate units for degassing, dosing and recycling are combined with an accurate dosing pump in one small, lightweight device. Accommodates a large range of recommended bonding resins.

6. **Bonding Station**
   VI2-Bond is installed to prevent air inclusions in the bonded disc at faster bonding times.

7. **Spinning Station**
   Dual spin bowls in series for high speed DVD production.

8. **UV Curing Station**
   - Adjustable power and curing time
   - Low power consumption
   - Simultaneous top, bottom and side curing
   - Excellent edge curing
   - Motor driven tilt compensation

9. **Final Cooling Conveyor**
   Eight positions for completed discs, including a lint blow-off station with exhaust system.

10. **Scanner**
    Ready for the latest version of quality inspection unit:
    - ETA-IS 3000 S DVD
    - ISM.dvd or ISM.blue from Dr. Schenk

    Other qualified scanner can also be integrated upon request.
