

CUSTOMER SERVICE

System Safety and ATEX Inspections

*Ensure the long-term safety
of your machines and a safe
working environment!*

Benefit from the Inspection and Maintenance of your Machines by our Experts

In accordance with directive 2009/104/EC, companies are obliged to ensure the safety of machinery and equipment and thus the health and safety of your employees. This includes all recurring and professional inspections and maintenance of machinery and equipment, especially in potentially explosive atmospheres.

Numerous regulations must be observed for the legally compliant performance and documentation of safety inspections.

We check and implement the country-specific requirements. These include, among others:

Industrial Safety Ordinance

- » Occupational health and safety
- » Technical rules for operational safety
- » Testing and maintenance of electrical systems

Get in touch with us! We will send you our experts and experienced employees to inspect and maintain your machines. Your benefits:

- » **Reliable implementation of the legal requirements for machine safety and occupational health and safety**
- » **Professional safety inspection and documentation by our specialists**
